

# Architecting Web Content Management Solutions with Microsoft Office SharePoint Server 2007 – Course 50049A

---

## Introduction

This course provides students with the knowledge and skills to design and architect Web Content Management (WCM) solutions based on Microsoft Office SharePoint Server 2007. The course focuses on architectural issues and decisions.

## Duration

This is a 2 day instructor-led course.

## Audience

This course is intended for experienced technical and solution architects who have a minimum of four years experience with Office SharePoint products and technologies.

## Delegates will learn to:

- Explain the key features of an Office SharePoint Server 2007 WCM solution.
- Take advantage of the content management architecture of Office SharePoint Server 2007.
- Optimise the server infrastructure for a WCM solution.
- Secure a WCM solution.
- Optimise the performance of a WCM solution.
- Customise and extend the WCM features of Office SharePoint Server 2007.

## Prerequisites

Before attending this course, students must have:

- At least two years working with SharePoint Products and Technologies in any of the following roles:
  - Solution Architect.
  - Technical Architect.
- At least two years practical experience as a lead developer (or provided architectural guidance to lead developers) in development projects for SharePoint Products and Technologies.
- Technical expertise in Microsoft Office SharePoint Server 2007.
- At least 6 months combined experience as a technical and solution architect for Microsoft Office SharePoint Server 2007 projects.
- Experience gathering and analysing customer requirements.
- Completed course 5061A: Implementing Microsoft Office SharePoint Server 2007.

## Course Outline

### Module 1: Web Content Management Overview

This module gives an overview of the WCM features of Office SharePoint Server 2007.

### Module 2: Architecting Content Management for Your Web Site

This module describes how to plan and design the look and feel of your site and how to manage content and the approval process.

We offer public courses at our training centres in London, the Thames Valley and Manchester or with our unique "Classroom in a Box" we can deliver training at your offices or venue of choice.

*"we deliver understanding"*

**Module 3: Server Infrastructure and Content Deployment**

This module describes how to plan and design server farms for WCM solutions and how to manage the deployment of content between multiple environments.

**Module 4: Securing a Web Content Management System**

This module describes the security considerations that apply to WCM solutions in Office SharePoint Server 2007.

**Module 5: Optimising Performance for Web Content Management**

This module describes how to ensure that your portal architecture responds well to the expected load from users.

**Module 6: Extending Web Content Management**

This module describes the ways in which you can customise Office SharePoint WCM so that you can include customisations in solution architectures.
