

## Implementing Windows SharePoint Services 3.0 – 5060A

---

### Introduction

Elements of this syllabus are subject to change. This course provides students with the knowledge and skills to successfully implement Microsoft Windows SharePoint Services (WSS) version 3.0 in their organisations. It emphasises that students should think about the architecture of their entire environment, including business and application needs, during the planning and deployment phases.

The course covers how to perform a clean installation of WSS 3.0 and also describes all the prerequisites required to select the most appropriate method for upgrading WSS from 2.0 to 3.0 in a specific scenario. In addition, the course focuses on how to manage WSS after it is configured.

### Duration

This is a 2 day instructor-led course.

### Audience

This course is intended for Business Application Administrators (BAAs) who are engaged in the planning, design, and selection of Line of Business (LOB) applications, including Microsoft Office SharePoint Server (MOSS), in conjunction with internal business customers. Their primary responsibility is the deployment, customisation, management, and support of LOB applications. They routinely monitor application status and troubleshoot application problems. The audience is expected to have at least two years of experience in implementing, managing, and supporting Microsoft Windows Server 2003, including Internet Information Services (IIS).

### Delegates will learn to:

- Describe how the Windows SharePoint Services 3.0 platform helps address collaboration challenges.
- Plan the Windows SharePoint Services 3.0 environment.
- Install Windows SharePoint Services 3.0.
- Identify the most appropriate method to upgrade windows SharePoint Services from 2.0 to 3.0 in a given scenario.
- Manage Windows SharePoint Services 3.0.

### Prerequisites

- Before attending this course, students must have:
- On-the-job experience in implementing, managing, and supporting Microsoft Windows Server 2003, including IIS.
- Working knowledge of networking, for example, TCP/IP and Domain Name System (DNS).
- Basic knowledge of key benefits of Microsoft Office SharePoint Server (MOSS), new features and functionality of MOSS, and WSS acting as a platform for MOSS.

In addition, it is recommended, but not required, that students have completed:

- Clinic 3369B, "First Look: Getting Started with windows SharePoint Service 3.0".

### Course Outline

#### Module 1: Introduction to the Windows SharePoint Services 3.0 Platform

This module explains how the Windows SharePoint Services 3.0 platform helps address collaboration challenges.

We offer public courses at our training centres in London, the Thames Valley and Manchester or with our unique "Classroom in a Box" we can deliver training at your offices or venue of choice.

**"we deliver understanding"**

**Module 2: Planning the Windows SharePoint Services 3.0 Environment**

This module explains how to plan the Windows SharePoint Services 3.0 installation environment.

**Module 3: Installing Windows SharePoint Services 3.0**

This module explains how to install Windows SharePoint Services 3.0.

**Module 4: Upgrading from Windows SharePoint Services 2.0 to 3.0**

This module explains how to identify the most appropriate method to upgrade Windows SharePoint Services from 2.0 to 3.0 in a given scenario.

**Module 5: Managing Windows SharePoint Services 3.0**

This module explains how to manage Windows SharePoint Services 3.0.
