

Microsoft ProClarity Analyst

Introduction

This ILT course provides students with the knowledge and skills to use ProClarity end user clients in order to create publishable content including business logic, custom data sets and key performance indicators. Students should leave the course with a good understanding of how to apply the client tools to problems within a business context. This course is primarily aimed at Analysts and advanced end users.

Duration

This is a 2 day instructor-led course.

Delegates will learn to:

- Describe OLAP terms.
- Produce views using ProClarity Professional Client.
- View data in various formats.
- Save and publish views locally and on the ProClarity Analytics Server.
- Integrate views with Microsoft Office products.
- Produce briefing books.
- Use the Business Logic Server (selector and KPI designer).
- Use the Dashboard server.
- View data using the Web Standard client.

Prerequisites

Before attending this course, students must have experience with Microsoft Windows® services and experience in the use of Microsoft Excel and Microsoft Internet Explorer.

Course Outline
